EXECUTIVE SUMMARY

Senior Project Manager | PMO | Turnaround and Digital Transformation

10 years delivering complex IT transformations. 16 projects and programs under direct management, totalling R\$ 61.7 million, plus portfolio oversight of R\$ 44 million in public-sector and corporate contracts through the PMO. End-to-end work on SAP S/4HANA and ECC, Salesforce, Oracle PLM Cloud and Zilliant, from Business Case to Cutover, Go-Live and Hypercare, including the turnaround of a R\$ 16.75 million program running 2 years late and taken into production. CAPEX/OPEX governance with SPI/CPI and EVA, corporate PMO set-up, rollouts and multi-country projects. PMP® - Project Management Professional (id 280089, valid to Sep/2029) - SFC™ - Scrum Fundamentals Certification (id 812841, no expiry) - Lean Six Sigma Green Belt (id 009854, no expiry). Advanced English.

KEY COMPETENCIES

- Turnaround and Project Recovery (Pricing Tool Brazil - R\$ 16.75 million): program taken over 2 years late and overspent, delivered with all 3 modules in production at the Apr/2024 Go-Live
- Go-Live, Cutover and Hypercare (TDW Brazil): 212+ hours of testing, 142 E2E steps, 49 modules in UAT, zero critical failures across 60 days of Hypercare, 40% reduction in manual processes; Pricing Analytics live in Mar/2025
- Financial Governance and CAPEX/OPEX Control: baseline, forecast/outlook, carry over, POs, invoices, reconciliation and monthly close; SPI/CPI and EVA; milestone renegotiation evidenced by data (CCR Migration, May/2026)
- Corporate PMO and Standardisation: PMO set-up, SGP implementation in SAP Solution Manager, CMMI level uplift and 3 public tenders won across a R\$ 44 million portfolio
- SAP S/4HANA, Salesforce and Oracle PLM Transformation: template design, regional rollout, Go-Live strategy, core integrations; RTM and Master Test Plan
- Multi-Country Programs: PMO for the LATAM Template phase of T4.ELO on SAP S/4HANA, with process baseline and the definition of 40+ regional squads; matrix teams of 8 to 25 people with no direct reporting line
- Contract and Vendor Management (Contract Manager on a R\$ 13.7 million program); vendor management and overrun mitigation
- Methodologies: PMI/PMBOK, Scrum, SAFe, Stage-Gate, FEL, Lean, SAP Activate and ASAP
- Tools: SAP S/4HANA and ECC, Solution Manager, Enable Now, Salesforce, Oracle PLM Cloud, Zilliant, Labware LIMS, Power BI, Tableau, SharePoint, Jira, Confluence, MS Project, HP ALM, ServiceNow, Bizagi

PROFESSIONAL EXPERIENCE

Dexian Consultoria May/2023 – Jun/2026

Client: Electrolux • PRM Transformation - Transformation Commercial Controller / Project Manager (PMO)

- Turnaround of Pricing Tool Brazil (R\$ 16.75 million, CAPEX 13.00 / OPEX 3.75): I took over the program carrying 2 years of delay, overspend and accumulated FX adjustment. I reassessed the roadmap and led the delivery of all 3 modules into production (Price Management, Deal Management and Price Analytics) at the Apr/2024 Go-Live, replacing spreadsheet-based pricing control with Zilliant SaaS. I then led the following Analytics phase through to the Mar/2025 Go-Live.
- Go-Live and Hypercare of Trade Deals Web Brazil (R\$ 2.67 million): replacement of the Vistex legacy system for trade agreement management, with TDW-SAP and TDW-Zilliant integrations, in a team of 25 people. Go-Live in Jan/2026 and Hypercare from Jan to Mar/2026, with 212+ hours of testing, 142 E2E steps, 49 modules in UAT and 27 participants. Results: zero critical failures over 60 days, 40% reduction in manual processes, 100% automation of calculations and reporting, and 7 process steps eliminated. I trained 15 key users across 22+ hours of training.
- Financial governance and portfolio control: I ran CAPEX and OPEX control by accounting account and Investment Request, with payment plans per vendor, PO raising, invoice checking, posting in SAP and reconciliation of committed, actual and available balance. I maintained the monthly close with BRL/SEK and USD conversion and the CPI calculation from EV and AC, reported in Status Reports to the Steering Committee. On the CCR Migration and the Sales Cockpit move from Tableau to Power BI (R\$ 210 thousand, Go-Live May/2026), I renegotiated the milestone from Apr to May/2026, supporting the change with data. I led the decision to discontinue Wave 2 of the Pricing Tool at the Jun/2026 Steering Committee.
- Structuring and scope expansion: on Dig4Sales (R\$ 6.60 million), the B2B e-commerce platform for the Direct Commercial Channel with scale potential from 2,800 to 8,000 active customers, I produced the RTM, a Master Test Plan with 128 cases and a 189-day master schedule across 7 phases and 5 milestones, on Salesforce, SAP/ERP and SharePoint. On the LATAM Improvements and TDW Wave 2 Brazil (R\$ 270 thousand OPEX), I led the migration to One Data and the financial interfaces with SAP and Sell Out.

Natura &Co Jan/2023 – May/2023

T4.ELO Program - Project Coordinator (PMO)

- PMO for the LATAM Template phase: I worked in the PMO of the phase that defines the program's process design, running the process baseline and the SIPOC of the SAP areas.
- Organisational structure and master data: I coordinated the process mapping for Finance and Accounting, Controlling, Procurement and Inventory Management, Sales and Distribution and Maintenance Management, with owners, deadlines and the definition, structuring and coding cycle, the SAP ECC to S/4HANA mapping and the log of open decision points, alongside the master data inventory by module (FI, CO, AA, MM, SD, PM and QM) with criticality classification.
- Fit-to-Standard workshops: organising the workshop agenda (Enterprise Structure and Business Processes) and by track (Finance, Supply Chain, Maintenance and HR), bringing together the implementation partner's facilitators and business and IT participants across the P2P, O2C, R2R, PTM and QM flows.
- Governance and rituals: I established and ran weekly meetings and Status Reports for Operations, the Transformation Office and the Steering Committee, underpinned by the phase schedule, a RACI matrix, cross-squad dependency mapping, risk control and a log of minutes and decisions.

Numen IT Consultoria Mar/2019 – Jan/2023

Clients: Johnson & Johnson and Natura - Project Manager / PMO

- Financial governance and portfolio reporting (Natura projects): I ran CAPEX and OPEX control in line with the client's SOP, maintaining the cost matrix by WBS element and cost centre across the full status cycle (estimated, proposed, approved, committed and actual), with an outlook of postings and payments by accrual month and reconciliation of actuals extracted from SAP. I fed the LPO, the corporate portfolio and project management system, and issued Status Reports with a scope, schedule, cost and quality dashboard, a risk matrix and plan versus actual financials.
- Hypercare Lead — J&J/Kenvue separation (Aug/2022 – Jan/2023): I led the Hypercare of the non-ERP Logistics, Transportation and Labelling applications in Brazil and Colombia during the corporate separation, coordinating local and global teams.
- Project Manager — LIMS v6→v8 upgrade at Natura (Jul/2021 – Feb/2022, R\$ 1,486,000): I led the Labware LIMS upgrade, closing with a net saving of R\$ 228,000 returned to the budget.
- Project Manager — Papalégua / Oracle PLM Cloud at Natura (Feb – Jun/2021): implementation for Regulatory Affairs across 8 countries: 6 in Latin America, plus Malaysia and France.
- BA and Scrum Master — SDM, Mexico rollout at J&J (Mar – Sep/2022): pricing standardisation for J&J Medical Mexico, with OneForce/Salesforce, SAP ECC B2B, WebMethods and STAR integrations.
- Test Lead, Release Manager and Tech Writer — BI Capacity, BW conversion and Medical Stable Team at J&J (Mar/2019 – Jan/2021): running test cycles and releases with HP ALM.

Tech Mahindra Apr/2016 – Mar/2019

Portfolio of R\$ 44 million in public-sector and corporate contracts - PMO Analyst — SAP Delivery

- ERP MPSC — SAP S/4HANA at the Public Prosecutor's Office of Santa Catarina (May/2018 – Mar/2019, R\$ 15,180,000): I worked in the program PMO, delivered on time and within budget, with full compliance to the public tender terms.
- Contract Manager — Liquigás Multiplatform (May – Oct/2017, closed Mar/2018, R\$ 13,700,000): contract and PMO management for the engagement.
- Corporate PMO and standardisation: I led the corporate PMO and implemented the SGP in SAP Solution Manager, raising the operation's process maturity through documentation, governance and project control standards, with 3 public tenders won in the period. Two cycles (Apr/2016 – May/2017 and Oct/2017 – Jan/2018).
- e-Social portfolio audit: I audited 6 projects in the e-Social portfolio for process adherence, deliverable quality and regulatory compliance with the statutory obligation, running the validations with each project's manager, assessing risks and reporting results to portfolio management.

COURSES & CONTINUOUS DEVELOPMENT

2026: Practical Application of Generative AI for Project Managers (PMI, 5h); Master AI with Gemini (Google, 2h); Free Leadership Training (SFBS, 1h); **2024:** ACP preparatory course (PMI-SP, 24h)

EDUCATION · LANGUAGES

Architecture and Urbanism — Fundação Armando Álvares Penteado (FAAP) · 1999–2004

Languages: Portuguese native · English advanced (C1) · Spanish intermediate · Italian basic
